Oil and Gas Lease Blanks.

The U.S. Government now is helping to develop Yellowstone and other National Parks. Secretary Lane of the Department of the

Interior is taking a lively interest in getting more citizens to see Yellowstone Park and our other national beauty spots, because our national scenic resources are properly conserved only when they are used by a maximum number of Americans.

An important part of the new gove nment program is the publication of beautiful, authentic descriptions of our great playgrounds in booklets which soon will be ready for free distribution. Through the courtesy of the Interior Department the Union Pacific System will co-operate in the movement to increase travel to Yellowstone Park by reprinting the government book on this wonderland.

To all who send in their names this book will be mailed as soon as it is off the press, together with full information on how to reach the Yellowstone, rates, etc.

About two-thirds of all who visit the Park enter through the western gateway (Yellowstone Station), the Union Pacific entrance, because Colorado and Salt Lake City may be seen on the way without added expense, and also because this makes a convenient side trip on the way to California or the North Pacific Coast.

Send for free booklets about Yellowstone.
